

# EP Connect Suite<sup>®</sup>

website integration suite for EventPro Software

EPConnect Suite connects your EventPro events and website, making it more convenient for both staff and clients to work with your business.

- 👁 Provide access for unlimited users
- 👁 Improve staff collaboration
- 👁 Attract clients with better service
- 👁 Protect sensitive information

EPConnect Suite integrates with your EventPro database information for real time access to key components of EventPro's functionality. No retyping or double entry – just accurate, efficient and convenient event management...**online.**

#### System Requirements

Requires the latest version of EventPro;  
Locally installed versions require .Net 4.0,  
Windows Server 2008+ and IIS 7.0+; knowledge  
of web servers in general; previous experience with  
HTML/CSS programming is not required, except to  
modify themes.

## take your event management and planning online

EPConnect Suite is modularized so you can customize it to your event management and planning needs.

- **EPConnect Calendar:** Web-based calendar display allows you to view EventPro's event calendar online with various display options. Use the powerful "Search" feature to find events by multiple criteria, or the "Find Space" function to locate the best-fit room quickly and easily.
- **EPConnect Bookings:** Includes the functionality of EPConnect Calendar, plus the ability to create and edit bookings. The step-by-step Booking Wizard ensures important information is collected, and can include Setup and Catering item selection.
- **EPConnect Opportunities:** Your clients (or potential clients) can add online Opportunities, which are automatically pulled into the Opportunities area of EventPro for easy processing and quick response turnover. Provide better, faster, customer service and attract clients with an enhanced web presence.
- **EPConnect Attendee Online:** Post your EventPro events online and invite attendees to enter their own registration information. Attendees can enter contact information, select event functions, select travel & accommodations, buy merchandise, register guests, pay, and more – all online! Alternatively, or as well, you can put together a list of attendees, pre-assign them to selected event functions and then email them an invitation. These emails can be mail-merged out in bulk with each recipient receiving a personalized email with links to accept or decline their personal invitation.
- **EPConnect Supplier:** No more last-minute miscommunications or disruptive double-checking from suppliers. With online event supply lists, vendors can find updated, accurate information in their own time, without interrupting your workflow. EPConnect Supplier is also convenient for scheduling temporary staff at events. Staffing managers can provide lists of relevant events and hours, without giving away private information to temporary personnel.
- **EPConnect Finance:** Allow users and your clients to conveniently make event and invoice payments online through your selected payment gateway. You can also create an online account portal with EPConnect Finance through which select contacts can log in to view, select & pay invoices and view previous payments.
- **EPConnect Payments:** The EPConnect Payments module provides the convenient option of accepting online payments as soon as a web booking or online registration is completed.
- **EPConnect Mobile:** Stay connected to EventPro 24/7 though your mobile device with EPConnect Mobile, where you can check events on the calendar, search for available event space, and make booking requests.
