

Deploy it YOUR way:  
On-Prem | Cloud

 **EventPro<sup>®</sup> Software**  
For Venue, Event and Catering Management

Deploy it YOUR way:  
On-Prem | Cloud

## You Ask – We Deliver

When we set out to create EventPro, one big priority was a cloud application – a frequent request of current and prospective clients alike.

We still offer an on-prem edition (installed on your desktop/network), so that everyone can access EventPro their way.

### Computer-in-the-Clouds?

If you have been hearing about “cloud computing” lately, but don’t quite know exactly what that means, here is the brief answer.

It just means that instead of installing EventPro and storing your data on-premises, *i.e.* on your local computer or network, the program and data are stored on remote servers. You access EventPro over the internet through a web browser – kind of like accessing your email through a web-based service instead of a locally installed program.

“... the software of choice for booking management...”

// *I have thoroughly enjoyed booking events with our software system EventPro. It is an unbelievably powerful software which allows us to not only book events but allows us to record comments, room set ups, food restrictions, and an array of other information that you need to host 12,000 guests a year. I highly recommend EventPro as the software of choice for booking management.* //

## The Cloud Advantage

So, why has cloud software become so popular? When working at their best, cloud applications allow businesses to become more mobile and adaptable to changing circumstances.

- **Convenient:**

In the cloud, you can access EventPro anytime and from anywhere with an internet-connected device. With the days of the 9-to-5/Monday-to-Friday office rapidly disappearing, workplace flexibility is a big advantage.

- **Improves Flexibility AND Collaboration:**

Even if you and your colleagues work in separate locations and different times, you are all collaborating in the same data that is always updated in real time.

- **Easy to Manage:**

With a cloud application, you don't have to deal with software maintenance. You don't need to worry about installing the program, setting up a server, downloading updates, and so on. You always have access to the latest version by simply logging in from your internet browser.

## Options for Everyone - Your EventPro, Your Way

While the cloud is a great option for many organizations, we know that other businesses still prefer to work from on-premises (desktop/network installed) applications.

We don't want to hold anyone back from the benefits of EventPro, so we're offering both options: On-Prem and the Cloud.

All EventPro applications have the same functionality, regardless of delivery mode, so you can choose the best option for you.

## What devices can I use EventPro Cloud on?

Powerful & flexible EventPro Cloud software is delivered seamlessly through the cloud to any device with a solid internet connection. That means EventPro Cloud is fully functional on the following systems and devices:

-  Windows Desktop
-  Windows 8
-  Windows 8 RT
-  Windows Phone

-  Mac
- iOS** iPad
- iOS** iPhone
- iOS** iPod Touch

-  Chrome OS
-  Android Tablet
-  Android Phone

-  Linux
-  HTML5
-  Blackberry 10

**How Does it Work?** EventPro Cloud is Enterprise-level software designed to run on computer servers. It runs through the EventPro Active Directory, and uses Citrix, the undisputed standard in remote network and software delivery.

## Your files - wherever you are!

With the delivery method used by EventPro Cloud you'll have easy access to your local network drives, files and printers. Not all cloud systems can do this and this is a key selection criteria when evaluating different cloud options.

## Reliable and Secure

EventPro Cloud runs on a Private Cloud Environment that is hosted on a Skyhigh Enterprise-Ready certified system. Skyhigh Networks performs objective and thorough evaluations of the enterprise-readiness of cloud service based on a detailed set of criteria developed in conjunction with the Cloud Security Alliance (CSA). Services designated as Skyhigh Enterprise-Ready are the services receiving the highest CloudTrust™ Ratings, which fully satisfy the most stringent requirements for data protection, identity verification, service security, business practices, and legal protection.

The EventPro Cloud application and data are housed in a Private Cloud that is hosted in one of Connectria's SSAE 18 SOC1 and SOC 2 certified data centers.

## Your OWN Database

Have you heard of the term multi-tenant? It means multiple companies have their data stored in the same database. That doesn't sound ideal to us, so that's why every client has their OWN database on the EventPro Cloud.

In the EventPro Cloud, all updates are still rolled out seamlessly to all of our clients in a simple process. You just get the added security of knowing that your data - and only your data - is sitting in YOUR OWN dedicated EventPro database.

## Choose What's Best for You

Every organization is unique, so not everyone will agree on what is the best choice for software delivery. Your EventPro Solutions Consultant will be happy to discuss the pros and cons of the On-Prem and Cloud options in relation to your business, with our unbiased recommendation.

 <b>ON-PREM SOFTWARE</b>	 <b>CLOUD SOFTWARE</b>
<b>INSTALLATION</b> Need to install on your computer or server	<b>INSTALLATION</b> Not required – runs in the cloud
<b>UPDATING</b> Need to manually update on computer or server	<b>UPDATING</b> Not required – updated by service provider
<b>PROCESSING</b> Workstation requires high memory and processing speed	<b>PROCESSING</b> Most processing done by service provider
<b>DATA STORAGE</b> Stored on your computer or server	<b>DATA STORAGE</b> Stored on cloud service provider's server
<b>SECURITY</b> Controlled internally by your IT	<b>SECURITY</b> Controlled by cloud service provider
<b>ACCESS</b> From local computer or workstation on the network	<b>ACCESS</b> From any device with internet access (e.g. smartphone, tablet, laptop, computer).
